

# USING YOUR MANTA POD

## To open the slides

Push down on the levers on both sides, the while holding down, pull them towards you until they release, then let go and pull the section full you until it locks into place

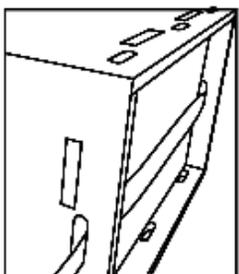

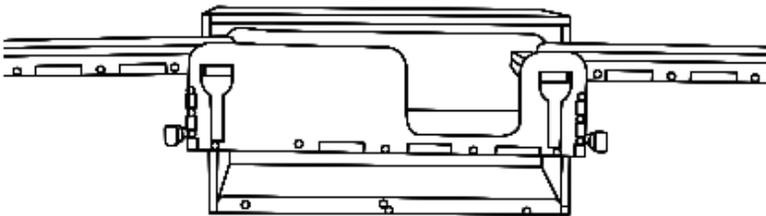

## The Side Tables

Then fold open the top side table, and the the other. There are three positions, closed, upright, and open. The upright position is perfect to use as a wind shield if you need it when youre cooking!

## To close the slides

To push the section back in, press again on the leavers and push in until it clicks again, now it is all secure

## Securing it down

To secure the pod down, there are strap holes to tie it down, this is recommended if you're cooking/ putting lots of pressure on the front end when it is open.
